## Zhejiang Lingya New Material Technology Co., Ltd.

Zhejiang Lingya New Material Technology Co., Ltd. is one of the first companies in China that has successfully developed the whole industrial chain from TPE material development, product design, mold process, and mass production. We specialize in providing professional and efficient personalized customization services to furniture brands.

The company has set up a technical laboratory, led by a Doctor in materials science from the University of Delaware, a professor from the Department of Automation of Southwest Jiaotong University, and a mold designer with 10+ years of experience, to continuously optimize the formulation of TPE zero-pressure super-elastic polymer materials, continually improve the scale of production capacity, and maximize the ability to provide personalized services. We have obtained many material patents, product patents, utility model patents, and appearance patents. The products have passed SGS, ROHS, and EU REACH environmental certifications. The company adheres to the "pursuit of innovation and mutual benefit and win-win" business philosophy. Adhering to the direction of ergonomics, health, and environmental protection, we have promoted material innovation in the furniture industry. We will work with our customers to create more top products and quickly meet the era of consumer upgrades brought by new materials. Make more consumers enjoy the new experience brought by Lingya products.

## Materials Introduction

### TPE material

It's environmental protection, non-toxic  
comfortable to the touch, beautiful appearance  
Make the product more creative  
Therefore, it is also a more humane  
High-grade new synthetic material  
It is also the world's standard  
environmental protection material

**TPE**

Technology Deep Sleep Pioneer  
SLEEP GRID

## **Thermoplastic elastomers New polymer materials**

TPE was first used in the U.S. aerospace industry for its high resilience, high adhesion, temperature resistance, fatigue resistance, and softness, and it has since been used in the U.S. furniture industry. It is molded at high temperatures into a hollow grid of elastomeric products of different sizes, specifications, and colors.

TPE materials can completely replace solid core fillings or combined fillings in furniture categories such as mattresses, sofas, pillows, and seat cushions

Not only does it completely solve the pain points of airlessness and easy collapse, but it can also be washed directly with water, making it truly clean and resistant.

The material has been widely used in advanced countries such as Europe, America, Japan, and Korea. The material is also used in many other fields such as medical and infant products.

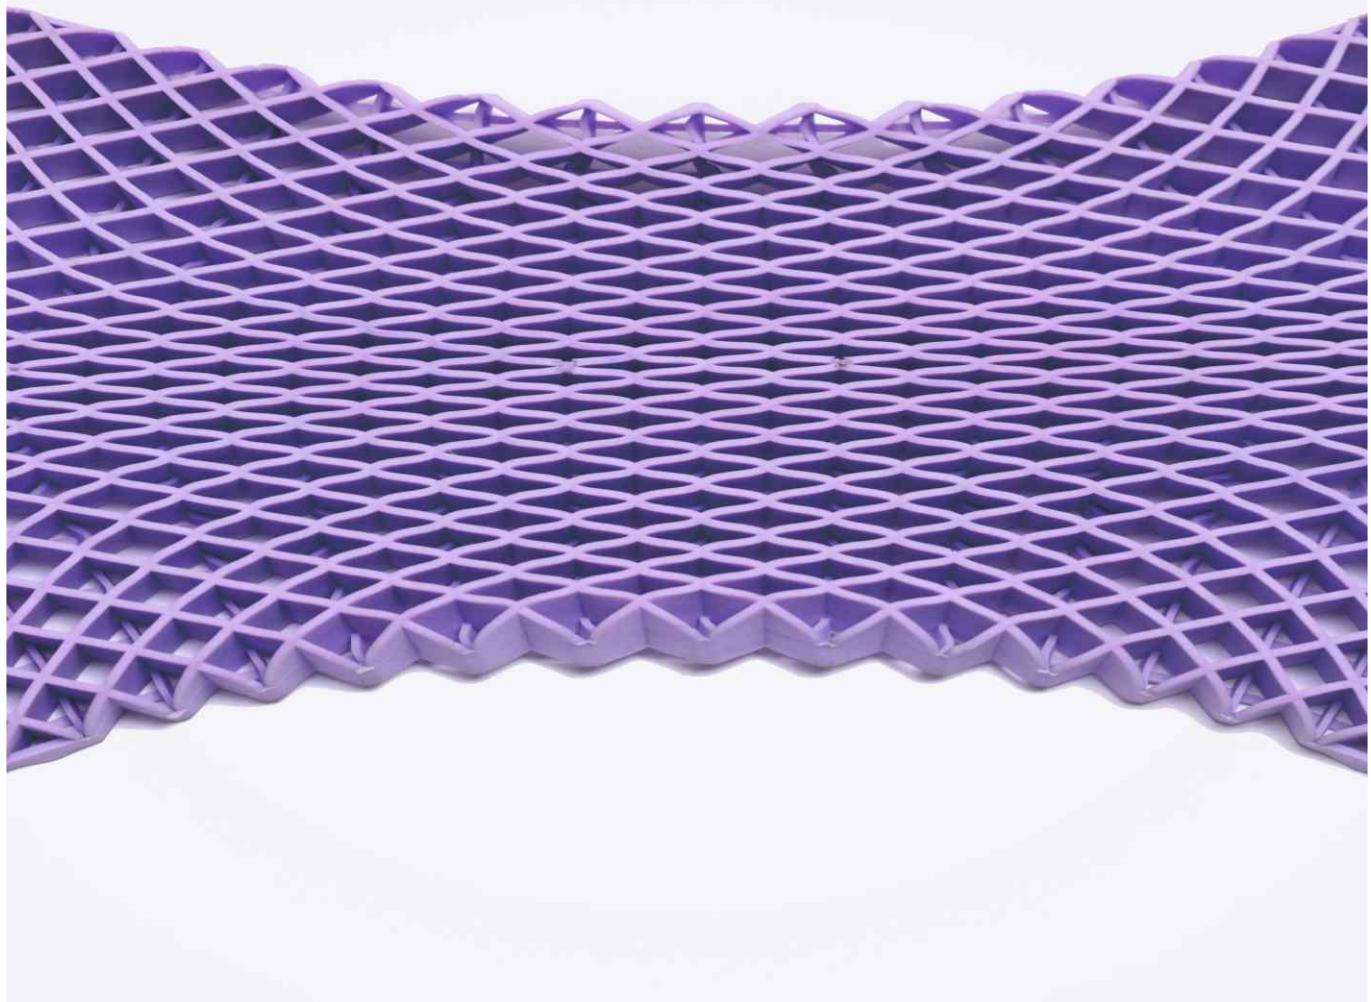

### **Original granular raw material An easy response to scale-up capacity**

Due to the high plasticity and application of this centrifugal material, it is possible to use it in a wireless environment.

Our team set up a technical lab two years ago to create a material formulation more suitable for the furniture industry.

And quickly obtained the SGS, ROHS and EU REACH environmental protection certifications

Pellet raw materials break through the industry's storage barriers and are a key technology for rapid response to long-term, large-scale production.

Super stretching capacity  
Up to 10 times

Long-lasting resilience  
Up to 10+ years

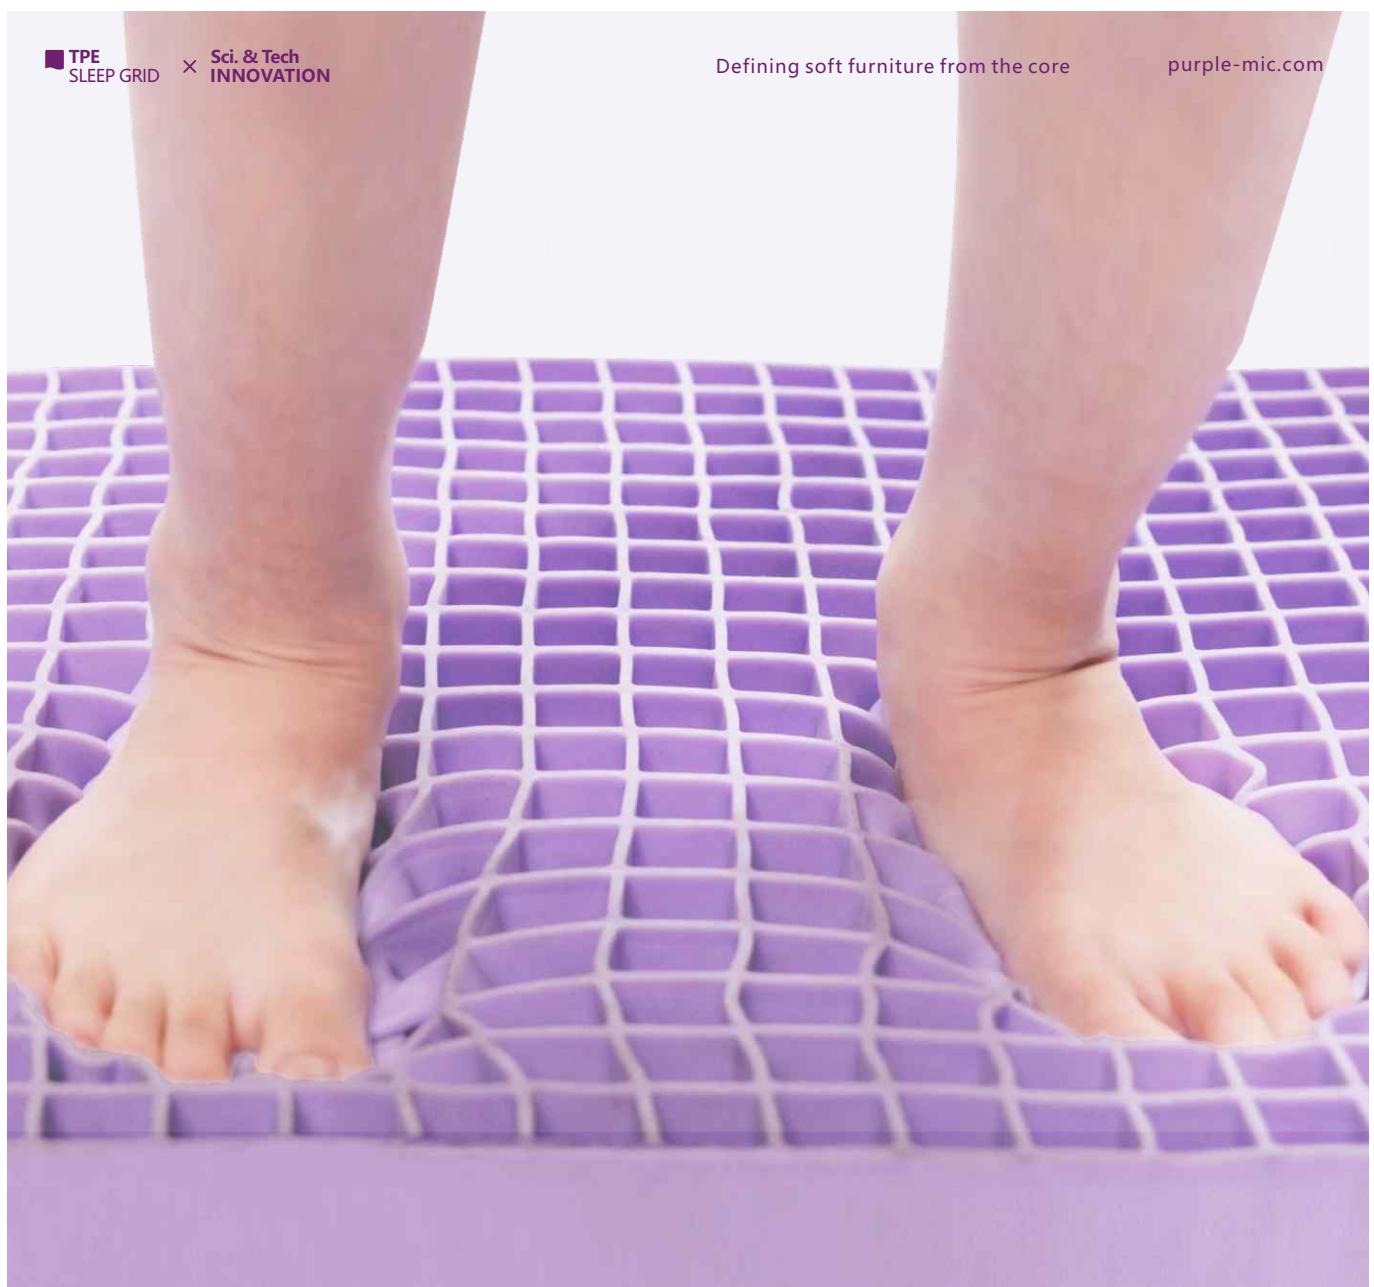

Scientific partitioning softer  
No pressure, and high elasticity

### TPE High Elastic Butterfly-shaped Pillow

Model: (Small) ZDX- 1

Measurements(cm): 50x30x4/6

Weight(kg) : Approx.1.4

Model: (Medium) ZDX-2

Measurements(cm): 55x38x7/9

Weight(kg): Approx.3.3

Model: (Large) ZDX- 3

Measurements(cm): 62x38x8/ 10

Weight(kg): Approx.3.7

### TPE Triangle High and Low Pillow

Model: (Small) ZSJGD- 1

Measurements(cm): 50x30x3/ 5

Weight(kg) : Approx.1

Model: (Medium) ZSJGD-2

Measurements(cm): 52x35x8/ 10

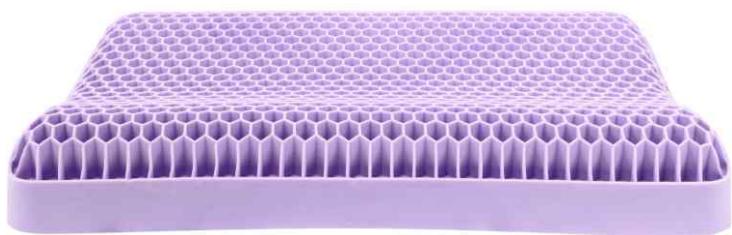

Weight(kg) : Approx.3

Model: (Large) ZDX- 3

Measurements(cm): 60x40x4/6

Weight(kg): Approx.3.3

## TPE High Honeycomb High and Low Pillow

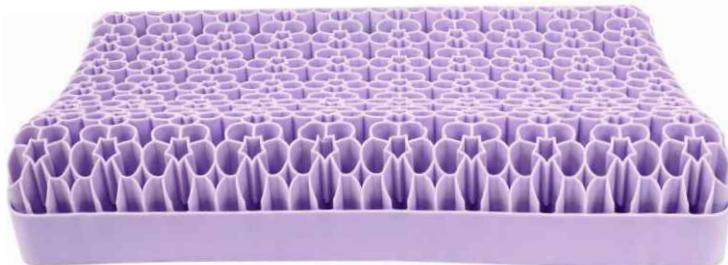

Model: ZFWGD-2

Measurements(cm): 52x35x8/ 10

Weight(kg): Approx.2.7

## TPE High-elastic Sakura High and Low Pillow

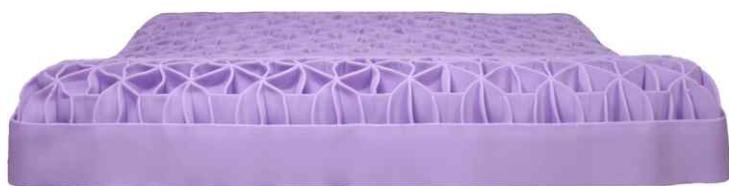

Model: ZYHGD-2

Measurements(cm): 52x35x8/ 10

Weight(kg) : Approx.3

## TPE Abnormal Triangle High and Low Pillow

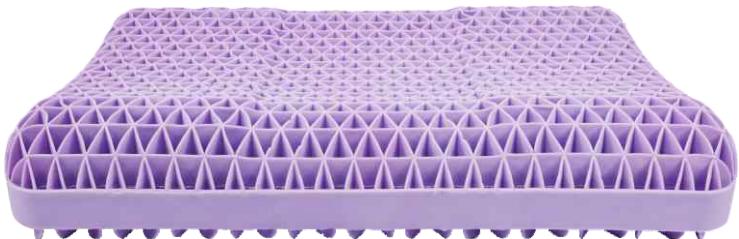

Model: ZYSSJGD-2

Measurements(cm): 52x35x8/ 10

Weight(kg) : Approx.2.8

## TPE Triangle Partition High and Low Pillow

Model: ZSJFQGD- 3

Measurements(cm) : 60x40x8/ 10

Weight(kg): Approx.3 .8

### TPE Triangle Flat Pillow

Model: ZSJDP- 3

Measurements(cm): 60x40x8

Weight(kg): Approx.4

### TPE Triangle Partition High and Low Pillow

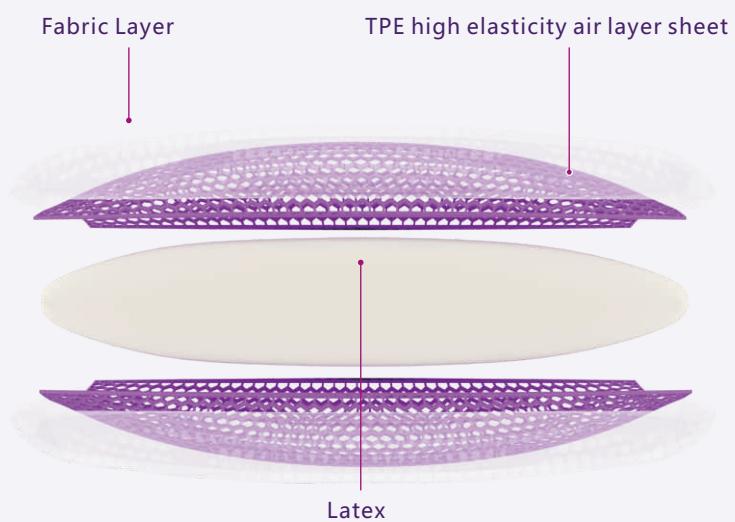

Model: ZFWDP- 3

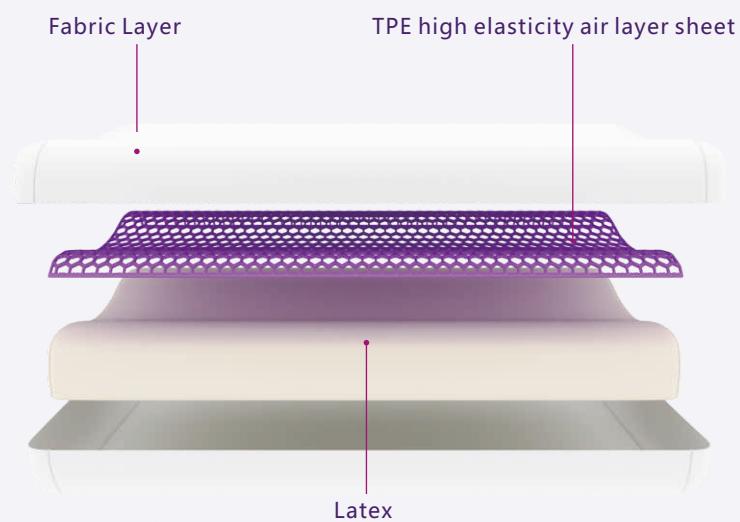

Measurements(cm) : 60x40x8

Weight(kg): Approx.3 .8
